

CaSTL Center Engage Families at O. C. Black History Cultural Faire

The CaSTL Center (Chemistry at the Space Time Limit) hosted a hands-on science booth at the 38th Annual Orange County Black History Parade and Cultural Faire in Anaheim on Saturday, February 3, 2018. CaSTL staff along with members of Orange County Alumnae Chapter of Delta Sigma Theta Sorority, Inc. conducted activities in the Youth Village with over 300 people that visited the booth. CaSTL featured the Bond Breaker game, an activity on making polymers, and using microscopes to visualize the physical properties of chemical substances.

CaSTL Outreach Director, Dr. Danielle Watt, and UCI Neurobiology grad student, Angeline Eugene, lead experiments at the booth.

Students getting comfy playing Bong Breaker.
